Suffer

Get Scared

Put me down just medicate me blind
Or you can take my wounds and pour some salt inside
I'm just a basket case
No one can judge my soul
You wanna bend but breaking down is in these bone
I've skinned my teeth for the last time
Gave all I had on the decline
And if you really wanna save me now
You better bring your guns and fucking take me out
Cut you open and make you sick
Suffer suffer
Suffer like I did
Take the poison and lock your lips
Suffer suffer
Suffer like I did
I found a cure for me
A fucking remedy to walk these streets
I felt the fear and loathing constantly
But you won't let me be
So now you'll feel my longing animosity
It's taken so long
To see through everyone
And now the time has come
To show you what I'm made of
Cut you open and make you sick
Suffer suffer
Suffer like I did
Take the poison and lock your lips
Suffer suffer
Suffer like I did
I felt the best side of me
To hide away and retreat
How will I last
From all the hell in my past
A battle out of my hands
Call me disaster and feel my disdain
So many moments that I can't erase
Cut you open and make you sick
Suffer suffer
Suffer like I did
Take the poison and lock your lips
Suffer suffer Suffer
Cut you open and make you sick
Suffer suffer
Suffer like I did
Take the poison and lock your lips
Suffer suffer
Suffer like I did
