

It's another day
And a chance for discovery
Gonna get out my way
Letting it out not smothering

Moving in uncharted ground
Filling hearts with how we hear the sound
And we're on to another one in due time

Someday fell on a Monday by chance
It had to happen given the circumstance
And we're on to another one for better or worse
And we're gonna discover one no matter how adverse

I'll come around in a better space
You can take that as a certainty
You'll come around in a better place
That's how it's destined to be

Coin devious loin
Capricious desoin
Auribus teneo lupum
Straighten your face
Never to be replaced

Well we whip it up
When laying the cut
Tracking ideas from the team
Down for posterity

Through the friction we came
Exploring every domain
Cross the musical sea
In solidarity

Someday fell on a Monday by chance
It had to happen given the circumstance
And we're on to another one for better or worse
And we're gonna discover one no matter how adverse

I'll come around in a better space
You can take that as a certainty
You'll come around in a better place
That's how it's destined to be

Coin devious loin
Capricious desoin
Auribus teneo lupum
Straighten your face
Never to be replaced
