

I know your password
I know the groove you needed me to master
Hadta no one else can do it no one faster
Expert with the tech the Hex will tell you what's next
I get in a state of flow I know I'm on the apex
Take a big leap no one can compete high as we wanna be
Fortified in what she set aside for the economy
A bad beat back on our feet high as we wanna be
Freak the freckles off your face changing your astronomy
(Crossfire)

Caught in the crossfire
So far we never missed at all
No man is an island
Even though once I thought I could be
In the crossfire
You really gotta keep your head
Or you will wind up dead
And I'm not ready for that

I'm a hieroglyph writ on a cliff
That's poking out the mist

Once you can decipher my science will fix
And if you're stranded can't stand it
Then I'll gift you a ship to sail
You out of those waters and lead you to fish
There's a methane storm on a planet that's warm
You'll find broken shards of pottery and alien forms
Plus a riddle that was left from a conscious queen
That's dynamite blow your mind like a laser, laser, laser
Beam

Caught in the crossfire (crossfire)
So far we never missed at all (never missed at all)
No man is an island (no man)
Even though once I thought I could be
In the crossfire (crossfire)
You really gotta keep your head (keep your head man)
Or you will wind up dead (wind up dead)
And I'm not ready for that (not ready)
