## Hey Yo

Send 'em up and watch them fall Is anybody talking at all?

Want it all reduced down to an equation So many variables came up as unknown So I stayed up all night long writing out the code But by morning light I lost all my concentration, yeah

Hey yo, hey yo, is our mind even open at all? Hey yo, hey yo, communication is broken, hit a wall By the time we get out of line it's all over for composure Hey yo, hey yo, do you hear what I'm saying? Is our mind even open at all?

Has the world ever granted you anything that you wish for? Has your soul felt uncertain on a future outside your door? Let the moments come, let go and let go and let go until it's a ll gone Has the world ever granted you anything that you wish for?

Hey yo, hey yo, is our mind even open at all? Hey yo, hey yo, communication is broken, hit a wall By the time we get out of line it's all over for composure Hey yo, hey yo, do you hear what I'm saying? Is our mind even open at all?
