

Holding onto a dream
Unknown destination
Feels like a thousand miles till another station whoa oh, oh
Far out beyond the prying eyes and neon sky
The answers quickly multiply
And ideas begin to fly

How many journeys on this trip
I say how much time till I live to RIP?
I don't wanna die just give me six
Six more lives till I feel equipped
Take the names of the sycophants
Smash their dreams into little bits
I don't wanna die just give me six
Six more lives till I feel equipped

Not for the faint of heart
It will not be painless
You'll take your licks and you'll never come out stainless whoa oh, oh
Outlandish dreams can come to pass, it happens so fast
There's no end to what you can achieve
But first you gotta believe

First you gotta believe

It wasn't overnight, it wasn't do you right
It was a to b and those label fights

Oh yeah money tight, five appetites
Have you seen those guys? They're quite a sight
Now here goes the sweat, here goes the set
Hear all the songs in our alphabet
Almost 30 years of blood sweat and tears
Still got that drive, still got that gear

Be sure, a discouraging word will be heard
It doesn't matter what they will say
The naysayers will do what they do
But to thine own self be true

This is what we came to say
The forces that be are on our side
The truth is something you can't hide
Give us what we came for
Give us what we came for
On the right side of history
When we first came with the unity
Give us what we came for
This is what we came to say

It's what we came for
It's what we came for
It's what we came for
It's what we came to say
