

Way past those days at last
These are times I'm not scared at all
Year round and I won't stumble down
That sunshine will rise if I fall

Yesterday went away
You always raised me higher

I keep on saying you got to meet me in the middle
That'll mean we've both got to give a little
I got no doubt that we can just work it out
Do you feel the same way?

There's a reason to be mad
But I want to live like I can
I hope that you understand me
Bo!

You've got a big cup
Baby let me fill it up
With all of my love
I said with all of my love
Smoking that good weed
Getting high we are stoners
On a highway with all of our friends

And with some loners

The coming of the light, that pure insight
Covered in the day and the night's divider
To be all alone with no one whatsoever
How in the world did this come together?
You wonder will it stop
Cuz no one can inhabit that mountaintop
Rubbing on my love just to get by
She is the one thing that keeps me high

Well it depends on whether or not it sounds true
It kinda defined the filter its gone through
It is a good time to be in my mind
Where possibilities will never end

There's a reason to be mad
But I want to live like I can
I hope that you understand me
Bo!
