A Lover Is Forever

Trisha Yearwood

```
C#            F#m     C#
I think I understand
                      F#m          A7
The reason you won't stay with me
                  F#m
You think a ring upon your hand
                       Bm   C#
will solve you insecurity

                 F#m             C#
So go ahead and play your games
                          F#m A7
If that's what you must do
               F#m             Bm
Nothing here remains the same
                        F#m
but the way I feel for you

  Am              Gm
I can watch you walk away
       F#m                Em D   Em
and I know that I'll get by
       Am                F#m
And I know just what to say
            Bm             E    Es D C#
but honey I can't tell a lie

So figure out what you must do
                          F#m             A7
I know you think you're so damn clever
               F#m               D
You can marry any time you want
       Bm          F#m
but a lover is forever
```
