

400 Ft. Robots

A Skylit Drive

Could this be real?
Corrupted secrets inside
That will eat you all alive

They were all wrong (all wrong)
They were all wrong (all wrong)

They're all alike
infected-degenerate
like poison in my mind

We light the candles and turn out all the lights
Power to a clinical paradox
It's time to break out
Hello to LA lights

(San Francisco will be shut down)

We wait in silence, speaking in whisper
They walk like giants that will swallow the ocean

Take your stand right here, right now
We will break you, we'll break you down
Cause in the end your fate is what you make

Could this be real?
Corrupted secrets inside
That will eat you all alive

They were all wrong (all wrong)
They were all wrong (all wrong)

They're all alike
Infected and corporate
like machines, they're sent to die

We light the candles and turn out all the lights
Power to a clinical paradox
It's time to break out
New York is not so bright

(San Francisco will be shut down)

We wait in silence, speaking in whisper
They walk like giants that will swallow the ocean

Take your stand right here, right now
We will break you, we'll break you down
Cause in the end your fate is what you make

When i see future that's afraid
i close my eyes to think of a better day
A chapter closed
The story goes on and on to turn the page

When i see future that's afraid
i close my eyes to think of a better day

A chapter closed
A story goes on and on to turn the page

A story on and on...
A story on and on...
