Too High to Get It Right

Getting everything is easy for you Fail for anything is something you can't do If it doesn't work in the way you want it for You start dreaming until it's right

Lie is lie - and truth is truth You'll turn it 'round, let someone else go down You won't remember and no one would wonder How you change it upside down

Too high to get it right (too high to get - too high to get) Too high to get it right

(too high to get it right) - too high to get it right (too high to get it right) - to get it right (too high to get it right) - too high to get it right (too high to get it right) - to get it right

To get it right

You can't deny it you're leaving your world You are so restless, who's the one who's hurt Living in your dreams and who seems to care Cheating you is easy, 'cause you don't understand

Holding on - letting loose Don't you feel that you are confused Too many words - not spoken out Too many things you've not thought about

Too high to get it right (too high to get - too high to get) Too high to get it right

(too high to get it right) - too high to get it right (too high to get it right) - to get it right (too high to get it right) - too high to get it right (too high to get it right) - too get it right (too high to get it right) - too high to get it right (too high to get it right) - to get it right (too high to get it right) - too high to get it right (too high to get it right) - too high to get it right

(too high to get it right) - to get it right
(too high to get it right) - too high to get it right
(too high to get it right) - to get it right
(too high to get it right) - too high to get it right

(too high to get it - too high to get it - too high to get it)

Too high to get it (right)
