

# Can't Say Goodbye

Adelitas Way

What a mess I made of everything  
I threw out all our years  
With a test you gave me back the ring  
Told me I should face my fears  
The grass I know is greener  
On the other side  
Is there still hope?

I should've known when I had you  
There's no one to take your place  
I should've known when I had you  
There's no one that can replace  
I can't say goodbye

All I need is one more try  
What you wanted was the little things  
To hold you when your near  
The rest will never mean a thing  
Wish I could change it all my dear  
The grass I know is greener  
On the other side  
Is there still hope?

I should've known when I had you  
There's no one to take your place  
I should've known when I had you  
There's no one that can replace  
I can't say goodbye

All I need is one more try

All I need is one more try  
(One more try)  
(One more try)

I can feel it when you call me your thinkin'  
The reason you won't come right back  
I turn around everytime your leaving  
It drives me crazy  
Don't know how to act

I should've known when I had you  
There's no one to take your place  
I should've known when I had you  
There's no one that can replace  
I can't say goodbye  
All I need is one more try  
What a mess I made of everything  
I threw out all our years
