Don't Turn Me Away

We shared such a special love It seemed to have no end But now it hurts me just to remember Your eyes used to tell me so much That words could never find And now you say you don't know Where your future lies But you've got to find it now Or get left behind

Please don't turn me away I can't forget it all in just one day Take some time to speak your mind But say it's not over Please don't turn me away Don't close the door on us this way I'm so sure that there's much more You just have to tell me

Remember those fireside nights It's not that long ago You said you wanted to stay there forever I have you the strength of my hand When things were running low I didn't know you would go back on What you said There must be some reasons there That you don't want to share

Please don't turn me away I can't forget it all in just one day Take some time to speak your mind But say it's not over Please don't turn me away Don't close the door on us this way I'm so sure that there's much more You just have to tell me

And just when you needed me I said I'd be there until the end What is it that's changed in you When all I want is to be your friend (I need a friend) Don't turn me away
