

# I Can't Understand

Air Traffic

So come on down and let it out  
Walk me through the corridors of fear  
It's not a dream without a doubt  
You try so hard to shut the feelings out

I lie awake and watch the stars  
A cry so far from where we are  
And in the haze of shattered light  
I break from the chains and drift into the night

'Cause I can't understand what's going on  
I can't understand what's going on

And now it seems so long ago  
We talked for hours and missed the last train home  
But are we weightless being blown  
Far from the heart and far from all we've known?

You said our love transcends this life  
Now I know it's true  
I cut my hands and close my eyes  
So I can feel it too

I can't understand what's going on  
I can't understand what's going on
