

Take A Little Trip

Alabama

If we could leave this big old city
And head back for the cabin we loved
Back deep in the woods
Baby, we would

If we could jump in some big old jet plane
Head for the islands
Where the weather is always good
Don't you know we would?

We can't do this and we can't do that
But baby we can stay right where we're at

Take a little trip, take a little trip
Take a little trip up to heaven tonight
Take a little time, leave it all behind
Take a little trip up to heaven tonight

We can go downtown to a nightclub
And dance to the rhythm of the music
On that old hardwood
Baby, we could

We could call up Rita and Bobby
And see what they're doing tonight
And maybe play some rook
Yeah, baby, we could

Yeah, now we can do this or we can do that
Or baby, we can stay right where we're at

Take a little trip, take a little trip
Take a little trip up to heaven tonight
Take a little time, leave it all behind
Take a little trip you and me outta sight
Pull down the shades, turn out the lights
Take a little trip up to heaven tonight

Take a little trip, take a little trip
Take a little trip up to heaven tonight
Take a little trip, me and you outta sight
Pull down the shades, turn out the lights
Take a little trip up to heaven tonight
