

Night Of Violence

Alec Empire

At first I couldn't move
Paralyzed; no chance to escape
The rain goes hard on my head
I can't see it but I feel its impact
Then everything goes dark
And my instinct kicks in
I have a feeling like I failed a test
Put something in motion that I shouldn't have

Night of violence
Night of violence
Night of violence
We gonna bring it to you!
We gonna bring it to you!
Night of violence
We gonna do it tonight!

I came here to get away
Away from everything
Rumours and legends
Fake achievements
It's all fading away
Freeze frame of a lightning
I have conquered my fear

I take a look in the mirror
I see a stranger staring at me
They took away our freedom

Hey!

Power spreading its poison
Kill one soul at a time
Enter the undermind
Too many of us are willing to die
This message is written in blood
The tide of madness will swallow us all

Night of violence
We gonna do it tonight!

I hear the sound of the masses
They bring back bad memories in me
Like something stabs my neck
Hits me like a bullet every time I hear it
My body wants to die
My mind wants to run
Makes me feel useless
And I wonder who I am

I take a look in the mirror
I see a stranger staring at me
They took away our freedom
