

True North

Alex G

You are the heart inside my chest
I wish you could see you through my lens
Seven years I waited for your hand
I could dance with you until the end

'Cause you see me
You see me

I was lost in my darkest night
Like my true north you became my light
You save me every time

You are the road I love to take
I could walk for miles in your embrace
Stories on a map across my face
Lines I'll never hide I'm not ashamed

'Cause you see me
Yeah, you see me

I was lost in my darkest night
Like my true north you became my light
You save me every time
Strong or weary I'm by your side
It won't be perfect but I will try
You save me every time

In this crowded room
All I see is you

I was lost in my darkest night
Like my true north you became my light
You save me every time
Strong or weary I'm by your side
It won't be perfect but I will try
You save me every time
