

Rats

Alice Cooper

Well give them lots of death, terror and hate
fill them full of meth, they just can't wait
give the rats what they want, give the rats what they want
Just open the cage, give the rats what they want
give them the cheese, the grill and the ride
some bling and some sex and they glow inside
give the rats what they want, give the rats what they want
just open the cage, give the rats what they want

Let 'em run the maze, let 'em ring the bell
let 'em chase their tails, let 'em go to hell
let 'em multiply (That's what they do)
You better give them what they want (or their coming for you)

Give the rats what they want, give the rats what they want
give the rats what they want, give the rats what they want
Just open the cage, give the rats what they want
open the cage, give the rats what they want
aww..open the cage, give the rats what they want
