

Hard and Strong

Alice Russell

Left the car at the petrol station
Standing there for all to see
There's the boat to see up
Starring back to me

I took your hand in front of all the people
Got to hear their minds and hurt the screens
Always wrong
Sick of stuff and spill the drinks

She is all around you in you and me
Games of our own creation
Fall to our hands and feet

Stop the fight it's useless
You can always stand and ask for more
Always wrong
So tell me what you're fighting for

You can't stop the lights from turning on
Though these words brought back
They come back hard and strong

So don't open up your window
Be sure to lock your door
As she is coming for us
As the sleeping on the floor

Tell your heart to reach for something more
All is wrong, watch people spill their drinks
Yes it's all around us, it's in you and me
The games that we created, for our hands and knees

Stop the fight it's over
We will watch others fall
It's freedom yes for granted
And what I saw we're fighting for

You can't stop the lights from turning on
Though these words brought back
It's the chemical make up biology

You can't stop the lights from turning on
Though these words brought back
They come back hard and strong

Stop the lights from turning on (4x)
