Never Took

One thing I know for sure
I never was a friend to you
You know when to know me
And you know when to be through
You call the shots
It's safe to bet that I regret that I
Never took the time to get to know you

Silence bothers some
But it's all that I can do
I never really thought about
Just what I put you through
I'll be around to cover ground
I left behind 'cause I
Never took the time to get to know you

The only thing I have to say for myself
I never really learned to deal with life
'Cause it's got a funny way of
Digging deep inside you until you feel so lost
Going too far – you can't stop

One thing I know for sure
Is that one and one make two
And there's no room leftover
For me to lie to you
I can't explain the way I fear
You won't be here
'Cause I never took the time to get to know you
Never took the time to get to know you

The only thing I have to say for myself
I never really learned to deal with life
'Cause it's got a funny way of
Digging deep inside you until you feel so lost
Going too far – you can't stop
