

Shining Star

And One

Let's make just another video dancing show
Dress you up and jump around
Let you go and everybody wants you down
Your style made by other parasites
Now they dial just another number to decide
You're the one - you get buried alive

Just tell me how it feels inside TV
Come down and see
Who sets you free

It's not your only life
Don't let them carry you
Your dreams will follow you tonight
It's not your only style
Don't let them drive you like a car
You'll never be a shining star

Let's sing like the other singers do
Not like you, it's the only way you should
Break in two as soon as you can let them down
It's more than people should deserve today

It's not your only life
Don't let them carry you
Your dreams will follow you tonight
It's not your only style
Don't let them drive you like a car
You'll never be a shining star

It's not your only life
Don't let them carry you
Your dreams will follow you tonight
It's not your only style
Don't let them drive you like a car
You'll never be a shining star
