

Will We Ever Change

Andi Deris

In a 1000 years from now the lasting human race
Somewhen had found a shelter somewhere out in space
A tiny planet going round a silver star
But life is dark and cold
Its sun is just too far

No, we haven't changed
No, we haven't changed
Can we be that strange
Can we rearrange

Will we ever change
Will we ever change
People
Will we ever change
Will we ever change
People

It's a strange new world of dawn and biting winter nights
So some got big and rich by selling heat and light
In the deep they found a fuel just awesome, safe and clean
But there's much more to earn with good old gasoline

No, we haven't changed
No, we haven't changed
Can we be that strange
Can we rearrange

Will we ever change
Will we ever change
Will we ever change
Will we ever change
People, evil, brother, sisiter, mister, lister
Will we ever change
Will we ever change
Will we ever change
Will we ever change
People

Will we ever change
Will we ever change
Will we ever change
Will we ever

Will we ever change
Will we ever change
Will we ever change
Will we ever change
Will we ever change
People, evil, brother, sisiter, mister, lister
Will we ever change
Will we ever change
Will we ever change
Will we ever change
People
