

Don't make me leave like this  
Without excuse from the table  
I swam too far in a flood

Don't make me use one wish  
We oughta save em if we're able  
I said to you in your blood

An alarm that we learned to ignore  
They don't make love like this anymore  
I'm so excited for you  
I'm so excited for you  
(I'm so excited for you)

Rewrite our history  
One where the rich get richer  
One like a binary star

Yea you're a mystery  
Like you've been hidden in a scripture  
Help me to find where you are  
Help me to find where you are

And the cards said we'd be better by now  
If they lied then we'll figure it out  
I'm so excited for you  
I'm so excited for you  
(I'm so excited for you)

(Don't make me use one wish)

Don't make me use one wish  
We oughta save em if we're able

Don't make me use one wish  
We oughta save em if we're able
