

You wanted a love state  
You're talking at anyone who will listen  
Where'd your blood go  
How could you forgive until you're forgiven  
Sparks fly upward  
You're learning the hustle  
You're learning that everyone in a room is in love with their own tongue

Last night I thought of you  
And the color lifted me from the ground  
Last night I swallowed you  
Now there's a spectrum inside my mouth

Still searching for trouble  
You wanted a tempt but not a tempter  
Where'd they find you  
Out looking for home that you don't remember  
Where did youth go  
On the young it is wasted  
I figure that everyone in a room is in love with you  
Everyone in a room is in love with you

Last night I thought of you  
And the color lifted me from the ground  
Last night I swallowed you  
Now there's a spectrum inside my mouth  
Oh and I'm burning up in stereo  
And you're radiating up from the sound  
Last night I swallowed you  
Now there's a spectrum inside my mouth

I don't know why I don't just leave you here  
Cause we are made up of all we've thought  
But now, right now  
You're all I've got
