

The Great Unknown

Anekdoten

Finally we are on our way
Where no man's gone
Launching deep into the great unknown
Space and time passing by
But the world outside
Is swallowed whole by the starless sky

I turned the key in the door
It's been a long time a-coming
I've been a long time gone

I can't believe this is happening to me
We have passed the sun
And something tells me this has just begun

I turned the key in the door
It's been a long time a-coming
I've been a long time gone

All the forces of the cosmos lead me on
As we shoot through the galaxy
I'm coming home!
