

Everything's Leading to You

Animotion

I could feel you from so far away
Coming closer to me day by day
Never knowing why I needed you
I needed you

When we met you looked so right to me
But each day was filled with mystery
And only time will tell what all of this means

All the pain and trials that I've been through
Couldn't shake me from working so hard
To get this close to you
Baby believe me that everything I do
Everything's leading to you

Find the gift for all the dues I've paid
Finally free from the mistakes I've made
Now let's work together into the shade

All the pain and trials that I've been through

They couldn't shake me from working so hard
To get this close to you
But baby believe me that everything I do
Everything's leading to you
Everything's leading to you

When we met you looked so right to me
But each day was filled with mystery
And only time will tell what all of this means

All the pain and trials that I've been through
Couldn't shake me from working so hard
To get this close to you
But baby believe me that everything I do
Everything's leading to you

Everything's leading to you
Everything's leading to you
Oh...
