I Engineer

Animotion

```
Don't count on me
I engineer
On every move we make from here
I'll take the lead
You take the pain
You see I engineer
This game

Who do you think you fool
When you talk about us
Why do you walk on glass
When you know it cuts
There must be a reason why
You put my life in overdrive
I'm up to here with push and shove
From here on in
I've had enough

Don't count on me
I engineer
On every move we make from here
I'll take the lead
You take the pain
You see I engineer
This game

I'll leave it all behind
In a cloud of dust
There's an even chance
I'll shine or rust
On my own I've got the time
Oh there's a light ahead
At the end of the line
Seeing you leaves me no doubt
I'll take the wheel
From here on out

Don't count on me
I engineer
On every move we make from here
I'll take the lead
You take the pain
You see I engineer
This game

On my own I've got the time
Oh there's a light ahead
At the end of the line
Seeing you leaves me no doubt
I'll take the wheel
From here on out

Don't count on me
I engineer
On every move we make from here
I'll take the lead
You take the pain
```

You see I engineer

Don't count on me
I engineer
On every move we make from here
I'll take the lead
You take the pain
You see I engineer

Don't count on me
I engineer
On every move we make from here
I'll take the lead
You take the pain
You see I engineer
