

He May Call

Anne Murray

I've been telling lies I never knew
All to keep that boy away from you
But he may call you up tonight
Then what could I say that would sound right

Thoughts that race my mind just pushed aside
All the chance is back where we once had
But he may call you up tonight
Then what could I say that would sound right

And when I'm crying
Yes I know my mind is flying
To a place where there's no trying
He may call you up tonight

He may call you up tonight
Then what could I say that would sound right
He may call you up tonight
Then what could I say that would sound right

I've been telling lies I never knew
Just to keep that boy away from you
He may call you up tonight
Then what could I say that would sound right
