

## Invite It

### Annihilator

Welcome to my panic and I'm sure you know the fool  
Where everything comes crashing down and madness is the rule  
Your mind is set to overload with doomsday information  
I see you've come here just in time to join the celebration

Don't fight it, invite it  
Voices in my head  
Just try it, entice it  
Telling me I'm dead  
Don't fight it, invite it  
Playing with my brain  
Just try it, entice it  
Driving me insane

Starting with that warm rush  
Slicing down the spine  
They tell me that it's not for real  
It happens all the time  
But something different's happening  
And I think this is the one  
I gotta get me outta here  
I gotta turn and run

Facing the shock and the terror alone  
A time bomb just waiting to blow  
You cannot escape and there's nowhere to hide  
You're fleeing with no place to go

Feeling like nothing can save me, a feeling I know all too well  
Imprisoned by paranoid madness, condemned to a life spent in hell

Everything is spinning round, this torture of the soul  
My heart is racing, can't stop shaking, I got to get control  
Terrified, don't wanna die, hysteria sets in  
But when you learn just to invite it, panic never wins
