Fight Forever

Anthem Lights

There's a war we're fighting On the front line for our King It's a battle for our souls Against a heartless enemy

Let us rise soldiers United by the call We give nothing less than all We might stumble, we might fall

But we won't raise that white flag We won't run or turn back We will hold on and never surrender We'll be strong and courageous 'Cause nothing can break us We'll fight for the King of Forever. Forever.

So let us join with the angels on the battlefield tonight There's no line between the nations When you're on the winning side

From the left to the right From the black to the white From the south to the north From the rich to the poor We are one voice, one force

But we won't raise that white flag We won't run or turn back We will hold on and never surrender We'll be strong and courageous Cause nothing can break us We'll fight for the King of forever, forever

Our King has won the war He reigns forevermore Alleluia, Alleluia

Our King has won the war He reigns forevermore Alleluia, Alleluia

Our King has won the war He reigns forevermore Alleluia, Alleluia

We won't raise that white flag We won't run or turn back We will hold on and never surrender We'll be strong and courageous Cause nothing can break us We'll fight for the King of forever, forever

Our King has won the war He reigns forevermore Alleluia, Alleluia Our King has won the war He reigns forevermore Alleluia, Alleluia

Our King has won the war He reigns forevermore Alleluia, Alleluia
