

Arrow And Bow

Apparatjik

Sub-particle entanglement theorem
I am half of us and in the moments where we don't exist
I am reminded of the saddest fact
That once entangled there is never any going back
Once connected, we are always and forever one
Not withstanding things we have not done

I miss you so
You speak to me
Nothing like that
Here where we come from
What is there to be said?
What are we to do?

I know we are gonna get it
I know we are gonna get away
What was it for and why did we lose it?

You can hide in the shadows
I won't go feeling that I mattered to someone

I miss you so
You speak to me
Nothing like that
Here where we come from
What is there to be said?
What are we to do?

I know we are gonna get it
I know we are gonna get away

You can hide in the shadows
I won't go feeling that I mattered to someone

Some words will change you
Will you get? Will you give?
Arrow and bow on your window
Some words will change you
Will you get? Will you give?

I know we are gonna get it
I know we are gonna get away

Some words will change you
Will you get? Will you give?

Arrow and bow on your window
Some words will change you
Will you get? Will you give?

I know we are gonna get it
I know we are gonna get away
Arrow and bow on your window
