

Shadow of the Sun

Aranda

Waited a thousand years now, I stand still in time
In a battle I'm not strong enough to fight
Give me faith that I once left behind
And now you're saving my life

How can I escape when there's nowhere to run
This won't let me wait until the morning comes
Fight through this storm I reach for you
Cause I never thought I find the one
In the shadow of the sun
The shadow of the sun

Even darkness won't let me hide (let me hide)
Moving so fast the stars fade to light
Should the sun ever refuse to shine
Still you're saving my life

How can I escape when there's nowhere to run
This won't let me wait until the morning comes
Fight through this storm I reach for you
Cause I never thought I find the one
In the shadow of the sun
The shadow of the sun

Wait, don't leave me down here without you
Wait, cause I can't remember the world I thought I knew

How can I escape when there's nowhere to run
This won't let me wait until the morning comes
Fight through this storm I reach for you
Cause I never thought I find the one
In the shadow of the sun
The shadow of the sun
