Among Dreams

Among dreams, we're best friends While in life we float apart It bothers me that you won't admit you love me Though it's precisely in your dream I'm livin' to love you Oh, to be wide awake beside you

Among dreams, we talk of they While in life they talk of me To you I'm a pathetic face but you know it's the truth cos in your dream I've known you forever now it's not my dream to remember

Please don't touch me Please don't want me Please be near me Please don't scare me Please don't leave me

Among dreams, I dream to be You would have loved to love me You notice me but you won't admit you love me Though it's precisely in your dreams to love you forever

no it's not my dream to remember oh to be wide awake beside you
