

# Gnosis of Prometheus

Arrayan Path

Wings of fire  
Through the endless seas  
That's what they've done to me  
God's desire is for me to flee  
And heal my soul from pain  
Finally, I endured the pain although  
The blood ran free  
Eaten slowly by a vicious bird  
For life eternally

Feel sad with the tears of the angels  
We've counting the years of the sun  
Alone, we're the sons of forever  
And the night will take our soul to He  
That will lead us all eternally  
I'm gazing the life of heroes  
They're sailing to the unknown  
Alone we're the sons of forever  
Take the gnosis of Prometheus,  
Gnosis of prometheus

On the rock, I have seen  
The lives of heroes and decay  
Out of reach from the world  
I long for rain  
to wash my wounds from pain

Tormentor, betrayer and soul collector  
Inventor, protector,  
Don't pray to the man deceptor  
Malefactor, reactor, deceiver,  
Uproarious actor  
Affecter, affector,  
Well here comes your flesh dissector
