## Love Jealous One, Love

## **As Cities Burn**

this is me at my darkest looking down from my tower to heaven my reputation is what I am on the scale in the eyes of mankind the more I get beneath me, the higher, and more out of reach teacher, which of us will be the greatest

we will wear compassion
we will wear it on our chests
and sing with love at our throats
like a child, it's all I know

Father, hide our hearts in you lest we steal them back and lay them at the feet of men I know now that glory has not a place near my hands or any man
