

# No Regret

Asher Monroe

Don't take the hard road, don't look back  
Stop making excuses, get on the right track  
And get your head out of the clouds, yeah  
And get your feet firm on the ground  
And while you're still ahead, don't settle for second best  
And live your life with no regrets

I was holding inside these secrets and lies  
They tore me apart, never gave up sight  
Admit my wrongs and swallow my pride  
I was given a second chance to find the light  
Wound up dead, overdosed  
Lift my head, comatose  
Instead I tore apart what truly mattered most

I was playing a dirty game  
And driving down the wrong lane  
Filled with guilt and shame  
I had to hit rock bottom where there's no-one else to blame  
I had to find myself  
Playing the victim never went over well  
Facing my fears that were plagued from hell  
Releasing me from the chains in my cell

Then I committed to turning my life around  
Gave up my sins, once I was lost, but now I'm found  
Hoping and praying that my life would make a sound

(You hear that music?)  
Don't take the hard road, don't look back  
(Very clever the way everything blends together)  
Stop making excuses, get on the right track  
(Open your eyes)  
And keep your head out of the clouds, yeah  
And get your feet firm on the ground  
(Alright)

For future generation  
(I'll tell you the truth)  
All of creation  
For future generation  
All of creation  
(Just listen)

I was playing a dirty game  
And driving down the wrong lane (yeah, yeah)  
Filled with guilt and shame (yeah, yeah, whoa)  
I had to hit rock bottom where there's no-one else to blame  
I had to find myself  
Playing the victim never went over well  
Facing my fears that were plagued from hell  
Releasing me from the chains in my cell

Let's all make a sound wave  
Let it vibrate  
Could start with just one change  
Living from better days

For future generation  
All of creation  
For future generation  
All of creation

Don't take the hard road, don't look back  
(Let's all make a sound wave)  
Stop making excuses, get on the right track  
(Let it vibrate)  
And keep your head out of the clouds, yeah  
(Let's all make a sound wave)  
And get your feet firm on the ground  
(Let it vibrate)
