

What's Gonna Be

Asking Alexandria

Sometimes I think about the old days
Remember where we came from
Reflect on what it took for us to make it this far
From dreaming in parking lot wasting away
To seas of faces, social status
And a sense of victory in my heart

Don't blink you'll miss what's coming next
Can you feel it in your chest
It's gonna be beautiful, say what you want about us
When's it ever slowed us down

With a little bit of faith a lot of patience
We turned this could be into something amazing
And I know, what's gonna be
We had a lot of dreams a little bit of godsend
Never could've dreamed where life would take us back then
And I know what's gonna be

Sometimes I think about the future
Imagine how it's gonna feel
To picture everything we've dreamed of coming to pass
Got high ambitions and we're gonna be
Forever chasing destiny
Manifesting more than we could ever conceive

Don't blink you'll miss what's coming next
Can you feel it in your chest
It's gonna be beautiful, say what you want about us
When's it ever slowed us down

With a little bit of faith a lot of patience
We turned this could be into something amazing
And I know what's gonna be
We had a lot of dreams a little bit of godsend
Never could've dreamed where life would take us back then
And I know what's gonna be

Well the time's come to lay it all
On the line and grow into something more
Than we had ever seen
We've waited all our lives for this day to come
For it all to pay off and become the sum
Of what we have worked to be

With a little bit of faith a lot of patience
We turned this could be into something amazing
And I know what's gonna be
We had a lot of dreams a little bit of godsend
Never could've dreamed where life would take us back then
And I know what's gonna be
And I know what's gonna be
And I know what's gonna be
What's gonna be
