## **As The Magma Mammoth Rises**

**Asphyx** 

Slumbering giant In the safe embrace of mother earth Warm nesting fetus Till contractions introduce its birth Awaiting dilation Lens of millenia have past Child of damnation And devastation not to forecast Denied malediction Embedded kilometers down Beneath the surface About to rise from underground Awakening sleeper Escaping darkness and gloom Emerging phoenix Now behold the bringer of doom

Deep form the chamber Comes an outburst Of immense magnitude Clear distant signal Smoke columns reach high altitude Broken the mantle

Under pressure great from within
Like a divine furnace
And the siege of the mammoth begins
Super volcano
Fire fountains on its colossal path
Out of the crater
Glowing fluid substances leak
Deafening thunder
Large trembling basalt plateau
Of epic proportions
Is the rack that follows the blow

Particles ignited
Burning fragments fly
Spewed out of the cauldron
Ejected in the sky

Enormous eruption Vaporizing lakes Massive streams of lava Globe destroying quakes

Outpouring magma
Molten stone and dissolving gas
Solid suspended crystals
All covering layers of ash
Grand mega caldera
Last of all catastrophes
Explosions resulting
In climatic abnormalities
Rapid glaciation
Aerosols obscuring the sun
Deforestation

Dramatic snowfall goes on Major crop failures Starvation on a tremendous scale In eternal winter Mankind's survival will fail
