

## Wildland Fire

Asphyx

Blackened horizons obscure the sun  
A howling, living engine of devastation  
Arson, drought, lightning, spontaneous combustion  
Nature on the rampage, widespread destruction

Untamable monster, formidable pyre  
Frenzied catastrophe, wildland fire

Burning vegetation, abundance of fuel  
Ferocious winds hamper any rescue  
Brave fighter units battling the blaze  
In extreme conditions suppressing the waves

Ancor point located, rockslide, road or lake  
To prevent outflanking, create the firebreak  
Unbearable temperatures, hot embers fly  
Prompting evacuation of the complexes nearby

Millions of acres consumed by the flames  
Smoldering ashes are all that remains  
Charring inferno, towering high  
Raging, scorching heat, wildland fire
