

Black Nights

ATB

{One-two-three-four}

Black night, white lights
Your eyes amplify
Like a heartbeat
On the downbeat lover
Black night, white lights
On the B-side, I found what I was after

Black night, white lights
You're so crazy nice
Like a small town
Filled with scyscrapers
Black night, white lights
So divine, take me downtown be my saviour

And the whole world is you
On this black night
Make everything come true
Under white lights

You're on my radar, on my radar
With your designer love
Before things get much crazier
There's something you should know

You're on my radar, on my radar
With your designer love
Sometimes when I watch you sleep
I think I made you up

You're on my radar, on my radar
With your designer love
Before things get much crazier
There's something you should know

You're on my radar tonight
You are

Black night, white lights
Your hand is locked in mine
Like a chain link
Sealing the exit
Black night, white lights
R.G.B.Y. this photo says I'm taken

Black night, white lights
You're so crazy nice
Like a small town
Filled with scyscrapers
Black night, white lights
So divine, take me downtown be my saviour

And the whole world is you
On this black night
Make everything come true
Under white lights

You're on my radar, on my radar
With your designer love
Before things get much crazier
There's something you should know

You're on my radar, on my radar
With your designer love
Sometimes when I watch you sleep
I think I made you up

You're on my radar, on my radar
With your designer love
Before things get much crazier
There's something you should know

You're on my radar tonight
You are

You're on my radar, on my radar
With your designer love
Before things get much crazier
There's something you should know

You're on my radar, on my radar
With your designer love
Sometimes when I watch you sleep
I think I made you up

You're on my radar, on my radar
With your designer love
Before things get much crazier
There's something you should know

Oh, my radar
Oh, my radar, tonight
