

Straight to the Stars

ATB

Second star to the right, I'm running
Far beyond this, endless field and sky
I feel a rush tonight

Slave to a vast unknowing
We seem a world away
And how I long for feelings like that again

I'm going back

Straight to the stars and I'm home
Farther than I've ever known
I sail it all alone
And it's the only way

Straight to the stars where I'm home
Fading the farther I go
I sail it all alone
And it's the only way

We decay

Out here, no now or then
A means without an end
No gods, no talk of man
We decay
And feel the moonlight reaching in
I felt lost and now begin
To break away

And it's the only way

Straight to the stars and I'm home
Farther than I've ever known
I sail it all alone
And it's the only way
(2x)

Straight to the stars where I'm home
Fading the farther I go
I sail it all alone
And it's the only way
We decay
