

There's ice in my water
And when I drink, it cuts my tongue
There's plants on the playground
That cut my skin when I run

And from the dark, into the light
I saw a stone burst into life
And in the corner of your eyes
A dream that never dies

Speak to me... Speak to me...
With love in your words
Make for me... Make for me...
A soft universe

My body falls off the side of her bed
And now I know what love feels like
Don't let me turn into pain
All of this is loveliness

Girl has came, we laid our head down
On a feather-covered bed
You find a heart and catch your breath
Let the universe go red

x2
Speak to me... Speak to me...
With love in your words
Make for me... Make for me...
A soft universe

Soft Universe... Soft universe...
