

All Night

Austin Mahone

I could come over right now or then
We could fuck around until we're numb again
Having round around, telling all your friends
That you've found the one [?]
How did you get [?]
Breathing in you, breathing out of me
Know your every curve, know them better than me
You just say the word, if you wanna let me

Take you to a place unknown
You're still wide awake I know
Face the fact we hate our nights alone
Baby, let me know if I can have your love

Can I love you all night, yeah
Can I touch you all night, yeah
Can you handle all night?
All night
Baby, can we take it all night, yeah
Can you make it all night, yeah
If I lay you naked all night
All night

We can take it right until the morning
You can tell I'm ready when I push up on it
You can lay on your side, baby, let me come slide
My name, I wanna hear you call it
I'm the only one that gets you, baby
And you can only get the best of me
My money really on it
Girl, you make it [?]
I've been thinking about it all-day
Baby, don't lie or be stuck on your brain
Give me 15 and get away
You know me, I'm on the way
Hold up
Speeding now, ocean
Call the beach boys, lick it up on the wave
Ain't no need of explaining
I know you've been needing an entertainer
You just lay back, girl I know your favorite
Pick a fantasy for me, [?]

Take you to a place unknown
You're still wide awake I know
Face the fact we hate our nights alone
Baby, let me know if [?]

Can I love you all night, yeah
Can I touch you all night, yeah
Can you handle all night?
All night
Baby, can we take it all night, yeah
Can you make it all night, yeah
If I lay you naked all night
All night

Oh, oh, you're breathing heavily
I know your body's tight but you wait on me
That's my tempo, keep riding and waste all night like that
We both know you can
Let me know if you can handle more, baby
Cause I can love you all night, till the morning time
