

Welcome to the Family

Avenged Sevenfold

Hey kid, do I have your attention?
I know the way you've been living
Life's so reckless, tragedy endless
Welcome to the family

Hey, there's something missing
Only time will alter your vision
Never in question, lethal injection
Welcome to the family

Not long ago you'd find the answers
Were so crystal clear
Within a day you find yourself
Living in constant fear

Can you look at yourself now?
Can you look at yourself?
You can't win this fight

In a way it seems
There's no one to call
When our thoughts are so numb
And our feelings unsure

We all have emptiness inside
We all have answers to find
But you can't win this fight

Hey, I have to question
What's with the violent aggression?
Details blurry, lost him too early
Welcome to the family

Hey, why won't you listen?
Can't help the people you're missing
It's been done, a casualty rerun
Welcome to the family

I try and help you with the things
That can't be justified
I need to warn you
That there is no way to rationalize

So have you figured it out now?
So have you figured it out?
You can't win this fight

In a way it seems
There's no one to call
When our thoughts are so numb
And our feelings unsure

We all have emptiness inside
We all have answers to find
But you can't win this fight

We're here for you and all mankind

I've lost my mind
Psychotic, I'm in dementia
I won't be fine

I see your escape has been dethroned
Cast out in a world you'll never know
Stand there, place your weapons by your side
It's our war, in the end we'll surely lose
But that's all right

So have you figured it out now?
So have you figured it out?

And in a way it seems
There's no one to call
When our thoughts are so numb
And our feelings unsure

We all have emptiness inside
We all have answers to find
But you can't win this fight

Deep inside where nothing's fine
I've lost my mind
You're not invited so step aside
I've lost my

Deep inside where nothing's fine
I've lost my mind
You're not invited so step aside
I lost my
