

## Acid Rain

Aviators

Hello, don't be shy  
I'll take you to the sky  
We'll fly away  
To better days ahead  
Hello, take my hand  
There's poison in the sand  
Don't worry I  
Can purify  
What's dead

I can't let you slip away  
The world's in disarray  
No one should have to stay  
I will take away the pain  
When only I remain  
To feel the acid rain

Hello, I'm the wind  
Guiding as you ascend  
So far away  
From better days ahead  
Hello, I'm the one  
The night sky and the sun  
I breathe this air  
In rivers running red

I can't let you slip away  
The world's in disarray  
No one should have to stay  
I will take away the pain  
When only I remain  
To feel the acid rain

I'll take you away  
To somewhere that the skies aren't quite so gray  
I'll be your escape  
The stars that lie above us will embrace

I can't let you slip away  
The world's in disarray  
No one should have to stay  
I will take away the pain  
When only I remain  
To feel the acid rain
