## Just Like You Like It

## **Backstreet Boys**

Turn the music way down low We'll take it nice and slow I'll play it for you, just like you like it Oh, we're two shadows in the dark Nothing between us but a spark I'll light this night up, just like you like it

Girl, it's all for you Everything I do You just set the groove I pour it on, strong and smooth We've got all night long So, tell me what you want I'm gonna love you just like you like it

Oh, just like you like it

I'll brush that hair back off your face Girl, let my fingers trace all over you Just like you like it You breathe my name, I feel the heat Now we're on fire in these sheets 'Cause I'm burning for you, just like you like it

Girl, it's all for you Everything I do You just set the groove I pour it on, strong and smooth We've got all night long So, tell me what you want I'm gonna love you just like you like it

Just like you like it Oh, just like you like it Just like you like it

I can feel you want to, in the air I know where you're going, I'ma get you there

Girl, it's all for you Everything I do You just set the groove I pour it on, strong and smooth We've got all night long So, tell me what you want I'm gonna love you just like you like it

Just like you like it Just like you like Just like you like it Just like you like it, just like you like it Just like you like it, oh, just like you like it Just like you like it, you like it Just like you like it, you like it Just like you like it, oh, just like you like it Just like you like it, oh, just like you like it Just like you like it, just like you like it
