## Navigate

**Band of Skulls** 

Everybody's back in town Give me the armour and let me prepare It can be easy or difficult, to steer The heart and breath stops death, cheats death It's clear Time and tide wait for no man Slowly realise as fast as you can Thought I saw a glimpse of how you were at five Ain't it strange how these things take you by, surprise

We are drifting on a deep sea And I can't navigate the stars like my father Oh we're drifting out to sea Into deep water If we're scared it puts us under

The more you talk the less you mean You told me that when I was just seventeen When it sinks in you will not always be here Funny how all your small worries disappear

We are drifting on a deep sea And I can't navigate the stars like my father Oh we're drifting out to sea Into deep water

If we're scared it puts us under

If you're thinking What you know is True then tell them Let them notice If your time comes Ask the question Were you tender To those you hold dear

We are drifting on a deep sea And I can't navigate the stars like my father

Oh we're drifting out to sea Into deep water...
