

# Just Remember

## Bars and Melody

You were my rock and now you ain't there  
Had so much time and memories to share  
Now your gone I don't know what to do  
My heart messed up in a daze and it's crazy to think  
You was here not long ago  
Now your gone you ain't around no more  
I'm putting on a front just to keep you close  
Not letting the world in so they can take away your memory  
And how we used to be so close together  
Now theres miles between us and there a change in the weather  
Replacing your sunshine and what you did for me  
When the world made me blind you helped me see  
Even through it's hard you keep battling on  
So many people torn apart but you gotta be strong  
The whisper that I cry out carried round the globe  
No matter where you may be  
Your heart is my home

Charlie Lenehan

People come and go  
But memories never fade  
They've gone away for a while  
And we'll never know why  
What hurts the most is seeing you  
Break down and cry  
Just remember they're still close to you  
Just remember they're still close to you

Leondre Devries

I know it's hard to stay and be strong  
But my heart is aching I can't take this any longer  
It's so hard without you making me smail  
Your words of strenght that always conjure  
The best of me that was who you are  
I named it after you the brigtest star  
Cause without you in my life there would be no hope  
Like noah and his ark god gave him the boat  
So if you hear this whenever you are  
Your in my mind your my shining star  
It's sad knowing you were here now you ain't  
It would kill for one last time to see your face  
But theres nothing left for me now  
I've give up  
Lifes so hard and it's treating me tough  
You don't know how much I love somebody till there gone  
Its hard on me but I gotta move on

Charlie Lenehan

People come and go  
But memories never fade  
They've gone away for a while  
And we'll never know why  
What hurts the most is seeing you  
Break down and cry

Just remember they're still close to you  
Just remember they're still close to you

Reminiscing on the days we shared  
Now your gone and we wasn't prepared  
Have to live everyday as the last  
Preaching that from a fatherless past  
Never knowing what you've got till its gone  
But life continues and that beat claps on  
Gotta stay strong and look up to the sky  
Put your hands together and belive in the guy

People come and go  
But memories never fade  
They've gone away for a while  
And we'll never know why  
What hurts the most is seeing you  
Break down and cry  
Just remember they're still close to you  
Just remember they're still close to you
