

Lights Go Down

Basement Jaxx

And when the lights go down
That's when it bites just a little
Bites just a little more
And when the lights go down, down
When the curtain falls
And there's no more applause
When the party's over
And there's no one to hold you
Look inside yourself and find
Your own light to ease your mind

And when the lights go down
That's when it bites just a little
Bites just a little more
And when the lights go down, down
That's when I die just a little
Wanna get high just a little more

That's when I die just a little
Wanna get high just a little more

When the curtain falls
And there's no more applause
When the party's over
And there's no one to hold you
Look inside yourself and find
Your own light to ease your mind

And when the lights go down
That's when it bites just a little
Bites just a little more
And when the lights go down, down
That's when I die just a little
Wanna get high just a little more
