

# New Day For You

Basia

Hello again it's me  
Your shoulder's where I sit  
The half, nobody sees  
Of a silent partnership  
I am here your help at hand

I'm never far away  
The clear view from where I stand  
I'll be there if you need me  
I am your helping hand  
My words, you've heard them all before  
It's only for the sake of love

It's gonna be a new day for you  
A new day for you  
The stars have played their part  
The past is gone and done  
I have more faith in love  
Best is yet to come

So what if this I here  
You deserve a break  
Take time to think it out  
Don't make a new mistake  
I am here your help at hand

It's gonna be a new day for you  
A new day for you, a new day for you, a new day for you  
The stars have played their part  
The past is gone and done  
I have more faith in love  
Best is yet to come

My words you've heard them all before  
It's only for the sake of love  
The stars have played their part  
The past is gone and done  
I have more faith in love  
The best is

It's gonna be a new day for you  
A new day for you, a new day for you, a new day for you  
It's gonna be a new day for you  
A new day for you, a new day for you, a new day for you

Hello again, it's me  
Hello  
Hello
