

We Shall Conquer

Battleroar

Tonight your place it shall burn
This night the tables they will turn
Tomorrow doom will be your fate
Your punishment will soon await

WE SHALL CONQUER

Tonight we'll storm pearly gates
This night your walls and bones we'll break
Tomorrow weeping is your hymn
Your punishment this day will bring

At night your cities fall - Your towers proud and tall
Like shadows we will come - Your soldiers overrun
No pity - No remorse - I wield the steel of force
With fire and with sword - hail the new overlord

At night your cities fall - Your towers proud and tall
With fire and with sword - hail the new overlord

Hail

Your battle weary men will bow
Your battle weary kin will frown
Your battle weary wives will spread
When all your hope is cold and dead

We now shall conquer all that's yours
Resistance we will not accept
All your hold dear taken by force
Your either yield - Alive or dead

Your life - Your honour - In my hands
It's time for you to understand
There is no way for you to win
Yes we shall rule - Better give in
