

# Come Fly With Me

beFour

We have ignition it's time to go  
A mission out of here  
You're heart is beating  
The light's go out  
The thrill is in the air

Everything change in a second  
And the darkness surrounds you like night  
But just in a minute a million of stars comes alive

Come fly with me  
Into infinity  
Reach for the stars  
They never been so close to you  
You took a step  
Into our fantasy  
And we take you to the end of the galaxy  
Come fly with me

A journey out of time and space  
Can take you anywhere  
Imagination fascinates,  
The magic fills the air

Everything change in a second  
And the darkness surrounds you like night  
But just in a minute a million of stars comes alive

Come fly with me  
Into infinity  
Reach for the stars  
They never been so close to you  
You took a step  
Into our fantasy  
And we take you to the end of the galaxy  
Come fly with me
